Roadmap

### VIII GROW TREE COIN (GTC) Affiliate Network

## IX AREA OF FOCUSING Natural Organic Farming and Allied products eCommerce/Merchant Platforms Online Gaming Public Crypto currency Exchanges:

## Introduction

Crypto currency is a medium of exchange that utilizes cryptography to secure transactions and control the creation of additional currency units. Over the past decade, the development of crypto currency has surged, providing a wide range of transactional possibilities for both users and organizations.

In this ecosystem, the distribution and value of the currency are not controlled solely by miners; the community plays a vital role as well. Our goal is to empower this community

through an Affiliate Marketing Channel, enhancing projects with GROWTREE. The GROW TREE Community aims to inspire, educate, and support its members. GROW TREE COIN (GTC) is a cryptocurrency associated with this initiative.

Our system is built on the Binance Smart Chain (BSC) application. The smart contracts on the BSC validate and protect rules regarding the distribution, freezing, and

## ownership of coins. These contracts are enforced by the Binance network and cannot be altered by the company or

### users.

## BLOCKCHAIN

A blockchain is a distributed database that enables the creation of a digital ledger of transactions shared among a distributed network of computers. It uses cryptography to allow each participant to manipulate the ledger securely without needing a central authority. The blockchain maintains a continuously growing list of records (blocks), each containing a timestamp and a link to the previous block.

GTC is built on a blockchain and is accessible as a decentralized application (DApp). The primary reason for using blockchain technology in GTC's development is to provide a stable and secure decentralized infrastructure for all parties involved.

## III. KEY ADVANTAGES OF BLOCKCHAIN TECHNOLOGY

### ol. Trustless Exchange:

Parties can transact without the oversight of a third party,

### significantly reducing or eliminating counterparty risk.

## o 2. Empowered Users:

Users maintain control over all their information and transactions.

3. Durability, Reliability, and Longevity:
Decentralized networks lack a single point of failure, making

### them more resilient to malicious attacks.

o 4. Transparency and Immutability:

Changes to public blockchains are visible to all parties, creating transparency, and transactions are immutable, meaning they cannot be altered or deleted. Blockchain technology is poised to revolutionize how individuals use emerging technologies. Large banks and

government institutions are exploring blockchain applications to provide more secure and trustworthy services. As blockchain technology gains mainstream acceptance, numerous cryptocurrencies emerge annually, all competing for market share. GTC aims to stand out by fostering a community around its core initial users.

## BENEFITS

Blockchain technology enables users to transfer funds quickly and easily without third-party intermediaries, unlike

### traditional banking systems.

## V. PROBLEMS

There are more than 2.4 million cryptocurrencies available now, according to coin price trackers.

o Reasons why new coins often fail in the market include:

 Supply exceeding demand.
Lack of proper community development.
Intense competition and many new coin entries.
Political uncertainty, geopolitical tensions, economic data, and ETF performance.
Insufficient liquidity in the market.
Poor customer service.

## 7. Insecure platforms.

## VI GROW TREE COIN TOKEN (GTC TOKEN)

Since June 2022, GrowTree.io has been actively involved in community development through affiliate marketing and has successfully built a network of half a million people. Currently,

the GrowTree and GrowFamily affiliate marketing network concepts are performing well in the market, providing satisfactory income and support to all partners. The organization is primarily focused on improving the environment by planting saplings for cleaner air, promoting eye donation, and educating society on healing diseases through non-medical means. Now, GrowTree.io is entering the cryptocurrency market and plans to leverage its existing

### community in this new venture.

## Vision

To create financial freedom and empower individuals through a decentralized, clerk-less, and paperless global payment network.

## Mission

To build a strong affiliate community, motivate members to

unite in a robust structure, and educate them to become selfsufficient.

**Goal** To cultivate a positive, vibrant, helpful, and strong community focused on happiness.

## VII GROW TREE COIN (GTC) Affiliate Network

The majority of GTC will be distributed through affiliate systems, where members are rewarded with coins. Grow Tree

has an established affiliate network, already operational on the growtree.io platform, enabling members to earn through our system. This will help expand our network further.

## VIII Eco-Life System (Future Plan)

### As the system develops, we predict a balance between

supply and demand for GTC, leading to an increase in value. GTC is designed for everyday use, aiming to serve as a viable alternative to fiat money, thus granting millions of unbanked individuals access to simplified payment methods and the same opportunities as banked individuals. This continuous reuse will help form a transactional ecosystem, enabling both online and offline transactions for goods and services.

## IX AREA OF FOCUSING

## Natural Organic Farming and Allied products

GTC promotes environmental sustainability through initiatives

like planting tree saplings ,encourage the natural farming, natural manures, farming tools and supporting medical treatments that do not rely on pharmaceuticals.

## eCommerce/Merchant Platforms

An expanding number of merchants accepting GTC will drive demand, enhancing its value.

## Online Gaming:

GTC aims to facilitate online gaming transactions, addressing challenges gamers face when funding accounts on various platforms.

Public Crypto currency Exchanges: GTC will provide opportunities for users to exchange various crypto currencies.
